Staff engineer and AI native builder with 15+ years shipping web and app products. Creator of Hermes Agent Desktop, a massively scaled AI agent platform. Mentor and leader in the AI space, deep in agentic systems, LLM tooling, and design driven frontend work.

Technical Skills

React (& native)/Next.js/Astro/Angular/Vue, shadcn/ui, React Query/SWR, Tailwind, ThreeJS
TypeScript/Go/Python/GLSL, GraphQL/SQL, Kubernetes/AWS/Terraform
LangChain, Qdrant, LLM tooling, RAG, MCP, evals, custom benchmarks, LoRA and harness finetuning

Professional Experience

Nous Research, nousresearch.com 2025 - Present
Staff Engineer

- Core contributor to Hermes Agent, a self-improving AI agent with a built-in learning loop: autonomous skill creation, agent-curated memory, and cross-session recall
- Invented Hermes′ coding context, bringing its coding capability to par with Cursor and similar tools
- Creator of Hermes Desktop: designed and built the app end to end, including its design system, pets, plugin SDK, theme SDK, and realtime generative UI widget building
- Grew Hermes to 10M+ users and millions in monthly revenue, driving a 9,000% increase in company revenue and 20x+ engagement of an already popular product
- Built the Nous Research website and the Hermes Agent landing page; led the design and frontend team

Braintrust, braintrust.com 2024 - Present
Lead Architect

- Built the AI interviewing platform from initial demo to a profitable product, now interviewing tens of thousands of candidates monthly
- Scaled the platform across 7+ languages for global enterprise use, with clients including Uber and McDonald′s
- Owned the architecture end to end: LLM pipelines, agentic workflows, and the web stack behind the product
- Led technical strategy for AI native product and platform work across enterprise clients
- Drove adoption from a single demo into a revenue-generating product line within the company

ExtendAI, extend.ai 2022 - 2024
Senior Full Stack Engineer

- Built a live video streaming service (OBS capture, RTMP ingest, WebSockets transport) feeding video/image frames through a pointcloud generation pipeline
- Developed a real-time particle system consuming pointcloud buffers to render 3D in a stylistic format, with WebSockets middleware serving multiple clients per customer
- Ideated and built a proof of concept 3D timeline showing motion through a 3D rendered scene, stitching frames and playback with multiple visualization modes

DrinkWorks, drinkworks.com 2019 - 2021
Senior Full Stack Engineer

- Migrated the tech stack from express/ejs to Next.js, allowing us to hire more engineers
- Supervised development efforts leading and mentoring a team of 7 other engineers
- Developed a powerful branded design system with storybook and custom contentful plugins
- Organized the architecture of a large scale GraphQL API with interconnected systems and external APIs such as auth0, shopify, contentful, geolocation availability services, et al. This made it possible to automatically resolve interrelated contexts and deep caching of objects that were exposed to the user

InVisionApp, invisionapp.com 2017 - 2020
Senior Full Stack Engineer

- Migrated a legacy stack from ColdFusion to Next.js with headless CMS integration, one of the first large companies to adopt Next.js, in partnership with the Next.js team
- Fronted the efforts for a public launch of Studio platform; a Figma competitor at the time
- Mentored and educated the team through the stack migration, running workshops, pairing, and driving mastery of the new tech stack

iFLY, iflyworld.com 2015 - 2017
Foda Studio, fodastudio.com 2013 - 2017
GKW, thegkwco.com 2010 - 2017
Glide Design, glidedesign.com 2009 - 2017
