kekeke

Hermes Agent, github.com 2025 - Present

- Built the desktop app's interface, its PDF pipeline, and its ChatGPT sign-in

Professional Experience

Nous Research, nousresearch.com Mar 2026 - Present

Design Engineer

- Leads the Hermes desktop app's interface, from the chat surface to its design system
- Shipped native PDF rendering that keeps an uploaded resume's own typography

BrainTrust, braintrust.com Jan 2024 - Present

FS Engineer & Consultant

- Built a real-time AI interview voice agent visualization in three.js and custom shaders
- Worked intimately w/ designers to help design and implement the UI interface, web/mic controls, et al
- Helped lead the integration of external teams and the finalization of complete e2e integration

ExtendAI, extend.ai May 2022 - Feb 2024

Senior Full Stack Engineer

- Developed a live video streaming service that went through a video/image-to-pointcloud pipeline
- Developed a real-time particle system that consumed pointcloud buffers to render to 3D in a stylistic format, using WebSockets as a middleware service to talk to multiple clients per customer
- Ideated and developed a proof of concept of a 3D timeline that showed motion through a 3D rendered scene, stitching together frames and a playback system along w/ different modes of visualization

ClubNFT, clubnft.com May 2022 - Feb 2024

Senior Full Stack Engineer

- Supervised a small group of designers/engineers to create a fully-featured design system, overall branding and eventual redesign of the app and marketing pages
- Managed the design and development efforts of API schemas and various backend requirements
- Developed the user facing app including user auth, stripe checkout, and an interactive dashboard

DrinkWorks, drinkworks.com July 2019 - Dec 2021

Senior Full Stack Engineer

- Migrated the tech stack from express/ejs to nextjs, allowing us to hire more engineers
- Supervised development efforts leading and mentoring a team of 7 other engineers
- Developed a powerful branded design system with storybook and custom contentful plugins
- Organized the architecture of a large scale GraphQL API with interconnected systems and external APIs such as auth0, shopify, contentful, geolocation availability services, et al. This made it possible to automatically resolve interrelated contexts and deep caching of objects that were exposed to the user

InVisionApp, invisionapp.com 2017 - 2020
Senior Full Stack Engineer

- Migrated a legacy stack from coldfusion to nextjs with headless CMS integration
- Fronted the efforts for a public launch of Studio platform; a Figma competitor at the time
- Hosted engineering workshops to aid my team in developing a mastery of the new tech stack
- Reduced a reverse proxy gateway from 1000s of lines to ~200 and created a marketing CLI

iFLY, iflyworld.com 2015 - 2017
Foda Studio, fodastudio.com 2013 - 2017
GKW, thegkwco.com 2010 - 2017
Glide Design, glidedesign.com 2009 - 2017
